SECURI-WALL

TECHNICAL SPECIFICATIONS MADE SIMPLE: THE STRENGTH BEHIND SECURI-WALL

When it comes to securing high-value properties, strength and speed matter. That's where SECURI-WALL shines; a patented wall and column system built tough for South African conditions and installed faster than any other walling solution on the market.

Here's why it's a cut above the rest:

1. ENGINEERED FOR SECURITY

Each SECURI-WALL unit meets strict South African National Standards (SANS 10160-3:2011), ensuring every wall and column is precision-manufactured and site-specific. Our reinforced concrete columns boast a powerful minimum strength of 40MPa.

2. FAST, RELIABLE INSTALLATION

We're not joking, up to 450 meters installed per week. With pre-cast panels made in a controlled environment, everything fits exactly as it should. Less time on-site, more peace of mind.

3. BUILT TO LAST

With a lifespan of over 75 years, a 2-hour fire rating and robust design suited for everything from industrial warehouses to solar farms, SECURI-WALL protects what matters most for decades to come.

**WHETHER IT'S NEXT TO HIGHWAYS, RAIL
LINES OR HIGH-RISK AREAS, SECURI-WALL
ISN'T JUST A BARRIER, IT'S A FORTRESS.**
