Applications of SECURI-WALL: From Airports to Solar Farms

Airports & Industrial Installations

Our patented precast panels, reinforced with 50 MPa concrete and prestressed steel, stand firm against impacts, extreme weather (winds up to 120 km/h) and attempts at intrusion. With a fire-resistant rating and fast installation at up to 450 m/week, clients secure high-risk zones quickly and durably.

Solar Farms & Commercial Properties

SECURI-WALL is ideal for wide-area security: modular, relocatable and low-maintenance. Panels up to 3.6 m high lock together seamlessly in tongue-and-groove fashion. They're tailor-made for remote solar farms, mines, data centres or anywhere robust, long-lasting perimeter protection is a must.

Residential & Mixed-Use Estates

SECURI-WALL walls are compatible with electric fencing, lighting and other enhancements post-installation, giving clients the flexibility to customise their perimeter to suit aesthetic or security needs.

Ready to secure your site efficiently and effectively? SECURI-WALL offers fast deployment, high security and long-term value across all your perimeter needs.
